With programs that utilize video presentations, animation, online guest lectures, advanced creative software, and more, students experience their lessons in new and different ways.

[Connect

We've built our online learning environment from the ground up, to provide an educational experience that is unique, engaging, and immersive.

Collaborative student projects are the heart of any Full Sail degree, and our online learning environment gives students the tools to easily network with one another.

Networking & Collaboration

Keeping students in contact with their instructors means advice and feedback are never more than one click away.

Our Story

More than 30 years ago, Full Sail began as a dream to create a place where people could learn how to take a passion for entertainment and turn it into a career. Today, people from all over the world come to Full Sail to pursue their passion, create the art they love, and share ideas with likeminded individuals. Due to the combination of Full Sail’s unique curriculum and the talent and dedication of our students, Full Sail graduates have consistently achieved the highest level of success throughout the entertainment and media industry.

In taking Full Sail University online, our goal is to use the experience and knowledge we’ve gained from 30 years of educational innovation to create an unparalleled online education that challenges and inspires our students. We look forward to seeing the next generation of artists, business leaders, educators, and entrepreneurs come through our virtual doors on their way to career success.

First you need to dream...

“Orville Wright did not have a pilot’s license”
- Gordon McKenzie

In nautical terms Full Sail means you are positioned in the best possible way to move forward at optimum speed.
Learning at Full Sail has always centered around interaction and the exchange of ideas, and our online curriculum fully embraces this philosophy. So we developed our own online learning environment from the ground up, with the aim of being the most people-focused education experience on the web.

One of the key goals of our online experience is to keep you connected to people. You’ll have one-click access to instructors working from Full Sail’s campus, exclusive guest lectures that expand the scope of your educational experience, and collaborative tools that enable you to meet, share, and receive feedback from your fellow students.

Online connection and collaboration are critical parts of the way business is done today, and will help you to begin building and expanding your professional network.
Innovative Curriculum

Full Sail’s educational philosophy emphasizes an immersive, real world approach to learning, combining elements of creativity, business and life skills, technical prowess, and academic achievement.

We’ve applied this same innovative approach in bringing Full Sail’s curriculum online. Our online students utilize the same software and creative tools students use every day in our classrooms, and our online curriculum is designed to provide students with an educational experience on par with any of our on-campus degrees.

The curriculum for our online programs is designed to challenge and inspire students, using a variety of delivery methods and styles. From video, animation, and podcasts to more traditional lectures and essay assignments, our goal is to find the most effective way to communicate important concepts. To accomplish this, we’ve developed extensive original content for students to experience throughout their education.

→ Immersive, Media-Driven Education
→ Equal of Full Sail’s Acclaimed On-Campus Programs
→ Intelligent, Engaging Content

“Full Sail’s dedication to innovative curricula is to be commended and is consistent with what today’s dynamic, technology-rich global economy demands from its professionals. Its progressive educational approach puts students and graduate success at the forefront of the institution’s mission.”

John Couch
vice president of Education
Apple
Full Sail is proud to offer an exclusive, first-of-its-kind initiative called Project LaunchBox®. This program provides our students with an Apple MacBook Pro notebook computer loaded with powerful software, all at a deep institutional discount. The integration of Project LaunchBox® into our curriculum allows students to utilize the power of Apple technology to create music, film, games, animation, design, and more.

We’ve also built our online curriculum specifically with the Mac platform in mind. The easy-to-use Apple operating system allows us to deliver more engaging and more intelligent content in a manner that’s intuitive and straightforward for students.

Throughout your education, your Mac is your connection to Full Sail’s online learning environment – your virtual classroom – allowing you to take full advantage of the tools, media, lectures, and more that comprise the curriculum of our online programs.

As an online student at Full Sail, you’ll have full access to any and all of our career development tools. But career development at Full Sail is more than a department—it’s a process that starts when you enroll and continues through your professional career.

Throughout the course of your education, and with the help of our career development advisors, we’ll provide you with the tools to develop your personal presentation skills, interview strategies, create a first-rate resume, and more.

As a Full Sail student, you’ll also participate in the Global Professionalism Standards (GPS) program, which helps to translate and develop your existing professional skills into the online world.

And as you prepare to graduate, our Career Development Department will be available to help you take your next step, whatever your career needs or goals may be.

Library Resources

Full Sail University’s Media Center is designed to support the needs of both online and on-campus students by providing meaningful and relevant materials, a comprehensive collection of necessary publications, and digital research databases that are broad and varied in scope.

The Media Center is easily accessible from Full Sail’s online learning environment, and its documents and materials are constantly reviewed and updated to make sure we are providing ample research material for all courses of study.

- Extensive Research Databases
- Easy Accessibility
- Constant Review and Updating of Materials

Career Development

- Custom Career Development Tools
- Personal Guidance from Advisors
- Lifetime Access to Career Development Services

Degree Programs for the Real World

Bachelor's

**DEGREE PROGRAMS**

**COMPUTER ANIMATION** Bachelor of Science Degree Program

Students in the Computer Animation Bachelor's Degree Program learn the technical and creative procedures used to develop content for games, television, film, and more. They also learn the latest motion graphics software and the business and project management skills necessary to succeed in the animation industry.

**DIGITAL ARTS & DESIGN** Bachelor of Science Degree Program

The Digital Arts & Design Degree Program offers comprehensive instruction in many areas of digital art and creative design, including 2D graphic design, and digital photography and animation.

**ENTERTAINMENT BUSINESS** Bachelor of Science Degree Program

The Entertainment Business Bachelor's Degree is a combination of business and communication courses that prepare students for the entertainment industry.

**FILM** Bachelor of Science Degree Program

The Film Degree Program prepares students to become competitive in the professional industry, television, and postproduction (job markets). Students are introduced to the industry, the business side, and the technical skills needed to succeed.

**GAME ART** Bachelor of Science Degree Program

Artists in the game industry require a unique set of design skills, and the Game Art Bachelor's Degree Program teaches the students the necessary skills to create engaging, immersive experiences across platforms for digital games, video games, and other digital media.

**MUSIC PRODUCTION** Bachelor of Science Degree Program

The Music Production Bachelor's Degree Program prepares students for careers in the music industry, including recording, mixing, and music production. Students will also learn how to develop and implement business plans and marketing strategies.

**RECORDING ARTS** Bachelor of Science Degree Program

The Bachelor of Science in Recording Arts (BSRA) prepares students for careers in the recording arts industry, including recording, mixing, and music production. Students will also learn how to develop and implement business plans and marketing strategies.

**ACADEMIC RESOURCES** Bachelor of Science Degree Program

Full Sail University's Academic Resources program provides students with the support they need to succeed in their studies and careers. The program includes academic advisors, learning centers, and other resources to help students stay on track.

**INTERNSHIPS** Bachelor of Science Degree Program

Full Sail University offers a unique combination of academic and professional experiences through internships. Students have the opportunity to apply their learning in real-world settings, build industry contacts, and gain valuable work experience.

**CAREER SERVICES** Bachelor of Science Degree Program

Full Sail University's Career Services department helps students navigate the job search process, prepare and submit applications, and connect with employers.
